**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Julie M. Seaman on 3/28/05.

The application has been amended as follows:

In claim 4, line 3, after "composition" and before "comprises", please insert ---has improved dry etching rate, and---; on the 4<sup>th</sup> line after the structural units A and B shown in Formula (2), after "and is" and before "polymer comprising", please delete ---the---, and insert thereof ---a---; further on the 4<sup>th</sup> line after the structural units A and B of Formula (2), after "polymer comprising 10-" and before "mol% of", please delete ---100---, and insert thereof ---95---; on the 5<sup>th</sup> line after the structural unit A and B shown in Formula (2), after "90-" and before "mol%", please delete ---0---, and insert thereof ---5---.

In claim 6, lines 3-4, after " shown in", and before "the Formula (2)", please delete ---the Formula (1) or---.

2. The following is an examiner's statement of reasons for allowance:

Applicant's amendment to claims 4, 6, 8-10, the cancellation of claims 1-3, and 7 filed in the response on 2/4/05 are hereby acknowledged. In light of applicant's amendment, previous 102 rejection over Wang et al. (US-421) is herein withdrawn. Wang et al. contain a N-halogenated phenyl maleimide unit as one of the essential component in patentees' terpolymer. This N-halogenated phenyl maleimide unit is not within the scope of applicant's maleimide structural unit (A) as amended. Wang et al. does not fairly suggest applicant's maleimide (A). Secondly, the 103 rejection over Padmanaban et al. is now withdrawn because applicant has shown criticality for the claimed polymer having A and B units, particularly a maleimide A having the recited R<sup>1</sup> as defined, in combination with (meth)acrylate B, having enhanced dry etching rate as shown in the comparative data of record. Applicant's claims are commensurate in scope with the showing of criticality.

Accordingly, the instant invention as defined by claims 4-6, and 8-10 is allowable over prior art of record due to unobvious result demonstrated for the scope of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to

avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
